Data Visualization Final Project

Diego Chiola , Gabriele Berruti , Alex Valle

October 24, 2024

1 Requirements

1.1 - github repo (invite annalisabarla as member)

Github Link : https://github.com/Berrutz/DataVis-Project

1.2 - github pages URL

Github Page : https://berrutz.github.io/DataVis-Project/ (To costumize)

1.3 - self-evalutation of web programming skills

The current programming skills of the 3 members are almost the same as those acquired in the first 3 years of the bachelor's degree in computer science attended at the University of Genoa, which consist of developing websites using such tools. We have a good knowledge of HTML, CSS, and JavaScript, as well as knowledge of frameworks such as React and Angular.

1.4 - technologies that you plan to use for web programming (e.g. JavaSript frameworks)

Regarding the use of Frameworks, we opted for React. Meanwhile, we still need to decide on CSS.

1.5 - strategies/technologies you are going to use for data handling/processing
